EVALUATION SCHEME

1. The evaluation scheme for each course contains two parts: internal evaluation (about 30%) and external evaluation (about 70%). Each of the Major and Minor courses is 4 credits. It is evaluated for 100 marks, out of which 30 marks are from internal evaluation and 70 marks are from external evaluation. Each of the General Foundation courses is 3 credits. It is evaluated for 75 marks, out of which 25 marks are from internal evaluation and 50 marks are from external evaluation.

2. The 4-credit courses (Major and Minor courses) are of two types: (i) courses with only theory and (ii) courses with 3-credit theory and 1-credit practical.
 - In 4-credit courses with only theory component, out of the total 5 modules of the syllabus, one open-ended module with 20% content is designed by the faculty member teaching that course and is internally evaluated for 10 marks. The internal evaluation of the remaining 4 theory modules is for 20 marks.
 - In 4-credit courses with 3-credit theory and 1-credit practical components, out of the total 5 modules of the syllabus, 4 modules are for theory, and the fifth module is for practical. The practical component is internally evaluated for 20 marks. The internal evaluation of the 4 theory modules is for 10 marks.

5. LETTER GRADES AND GRADE POINTS

- Mark system is followed for evaluating each question.
- For each course in the semester letter grade and grade point are introduced in 10-point indirect grading system as per the guidelines given below.
- The Semester Grade Point Average (SGPA) is computed from the grades as a measure of the student's performance in a given semester.
- The Cumulative GPA (CGPA) is based on the grades in all courses taken after joining the programme of study.
- Only the weighted grade point based on marks obtained shall be displayed on the grade card issued to the students.

LETTER GRADES AND GRADE POINTS

Sl. No.	Percentage of Marks (Internal & External Put Together)	Description	Letter Grade	Grade Point	Range of Grade Points	Class
1	95% and above	Outstanding	O	10	9.50 – 10	First Class with Distinction
2	Above 85% and below 95%	Excellent	A+	9	8.50 – 9.49	
3	75% to below 85%	Very Good	A	8	7.50 – 8.49

6	45% to below 55%	Average	C	5	4.50 – 5.49	Second Class
7	35% to below 45% aggregate (internal and external put together) with a minimum of 30% in external valuation	Pass	P	4	3.50 – 4.49	Third Class
8	Below an aggregate of 35% or below 30% in external evaluation	Fail	F	0	0 – 3.49	Fail
9	Not attending the examination	Absent	Ab	0	0	Fail

- When students take audit courses, they will be given Pass (P) or Fail (F) grade without any credits.
- The successful completion of all the courses and capstone components prescribed for the three-year or four-year programme with 'P' grade shall be the minimum requirement for the award of UG Degree or UG Degree Honours or UG Degree Honours with Research, as the case may be.

5.1. COMPUTATION OF SGPA AND CGPA

- The following method shall be used to compute the Semester Grade Point Average (SGPA):

The SGPA equals the product of the number of credits (C_i) with the grade points (G_i) scored by a student in each course in a semester, summed over all the courses taken by a student in the semester, and then divided by the total number of credits of all the courses taken by the student in the semester,

$$\text{i.e. SGPA } (S_i) = \frac{\sum (C_i \times G_i)}{\sum C_i}$$

where C_i is the number of credits of the i^{th} course, and G_i is the grade point scored by the student in the i^{th} course in the given semester. Credit Point of a course is the value obtained by multiplying the credit (C_i) of the course by the grade point (G_i) of the course.

$$SGPA = \frac{\sum \text{of the credit point of all the courses } \in \text{ a semester}}{\text{Total credits } \in \text{ that semester}}$$

ILLUSTRATION – COMPUTATION OF SGPA

Semester	Course	Credit	Letter Grade	Grade point	Credit Point (Credit x Grade)
I	Course 1	3	A	8 4	$3 \times 8 = 24$
I	Course 2	B+	7 3	B	$4 \times 7 = 28$
I	Course 3	6 3	O	10	$3 \times 6 = 18$
I	Course 4	3	C	5 4	$3 \times 10 = 30$
I	Course 5		B	6	$3 \times 5 = 15$
I	Course 6	20			$4 \times 6 = 24$
	Total				13

- The Cumulative Grade Point Average (CGPA) of the student shall be calculated at the end of a programme. The CGPA of a student determines the overall academic level of the student in a programme and is the criterion for ranking the students.

CGPA for the three-year programme in CUFYUGP shall be calculated by the following formula.

$$CGPA = \frac{\sum \text{of the credit points of all the courses } \in \text{ six semesters}}{\text{Total credits } \in \text{ six semesters (133)}}$$

CGPA for the four-year programme in CUFYUGP shall be calculated by the following formula.

$$CGPA = \frac{\sum \text{of the credit points of all the courses } \in \text{ eight semesters}}{\text{Total credits } \in \text{ eight semesters (177)}}$$

- The SGPA and CGPA shall be rounded off to three decimal points and reported in the transcripts.
- Based on the above letter grades, grade points, SGPA and CGPA, the University shall issue the transcript for each semester and a consolidated transcript indicating the performance in all semesters.

V	Open- Ended		30	
	Suggested Activity: Module I: 1. GD-Define communication and explore its essential components (sender, message, channel, receiver, feedback). 2. Discuss how effective communication hinges on clarity of message, choice of channel, and interpretation by the receiver. 3. Watch video clips or analyze pictures to identify and discuss examples of nonverbal communication (body language, facial expressions, gestures). Compare how nonverbal cues can complement or contradict verbal messages. 4. Research and present on different communication systems used by animals or across cultures. Discuss how signs and symbols convey meaning in different contexts (e.g., traffic signs, emojis, international symbols). 5. Learn basic phrases in a sign language (e.g., American Sign Language, British Sign Language) and discuss the similarities and differences between spoken and signed communication. 6. Create a timeline or infographic that highlights key		7	

	<p>milestones in the history of English, from its Germanic roots to its global spread and varieties (e.g., British English, American English, Indian English).</p> <ol style="list-style-type: none"> 7. Compare and contrast varieties of English spoken in different regions (e.g., African English, Caribbean English). Analyze how these varieties reflect cultural identities and linguistic adaptation. 8. Research and present on the advantages and challenges of English as a lingua franca in global communication, business, and diplomacy. Discuss the implications for cultural diversity and language preservation. 		
	<p>Module II:</p> <ol style="list-style-type: none"> 1. Divide learners into groups to analyze a piece of writing (e.g., a newspaper article or a dialogue from a TV show). One group focuses on describing the language used (descriptive), while the other group identifies and discusses any prescriptive rules that might apply. Compare findings and discuss the implications of each approach on language study and usage. 2. Choose a specific linguistic phenomenon (e.g., the evolution of a word's meaning, changes in pronunciation over time). Learner's research and present on how diachronic (historical) and synchronic (current state) approaches would analyze and explain this phenomenon. Discuss the insights gained from each perspective. 3. Discuss how phonetic details affect phonological patterns in different languages. 4. Create a word formation game where learners build new words using prefixes, suffixes, and roots. Discuss how morphological analysis helps understand word structure and meaning. 5. Analyze and diagram sentences from literature or news articles to identify syntactic structures (e.g., sentence types, clauses, phrase structures). Discuss how syntax influences meaning and communication. 6. Explore semantic shifts in language over time by examining the evolution of words' meanings. Create timelines or visual representations that illustrate semantic changes and their cultural or historical 	7	

	<p>contexts.</p> <ol style="list-style-type: none"> 7. Conduct a language variation survey within the school or community to investigate regional dialects or sociolects. Analyze the results and discuss factors influencing language variation (e.g., age, ethnicity, social status). 8. Organize debates or panel discussions on contemporary linguistic issues (e.g., the impact of technology on language, linguistic human rights). 		
	<p>Module III:</p> <ol style="list-style-type: none"> 1. Conduct a practical session where learners practice articulatory phonetics by identifying and producing different speech sounds. Use diagrams and models to illustrate the speech organs and air stream mechanisms (e.g., pulmonic, glottalic). 2. Create a vowel chart and consonant chart based on the IPA (International Phonetic Alphabet). Practice distinguishing between monophthongs, diphthongs, and triphthongs. Discuss the articulatory features (place, manner, voicing) of each phoneme. 3. Provide examples of English words and phrases and have learners transcribe them into IPA symbols. Discuss variations in pronunciation across different English accents (e.g., Received Pronunciation, General American). 4. Create minimal pairs (words that differ by one sound) and have learners identify phonemic contrasts versus allophonic variations. Discuss how phonological rules govern allophonic variation in different languages. 5. Analyze the Great Vowel Shift and its impact on modern English pronunciation. Compare and contrast vowel and consonant phonemes in English with those in learners' native languages. 6. Provide examples of words and ask learners to identify their morphemes (e.g., prefixes, suffixes). Create exercises where students analyze word structures (e.g., base, root, affix) and classify morphemes as free or bound. 7. Assign learners to create new words using different word formation processes (e.g., derivation, compounding, blending). Discuss how these processes contribute to lexical diversity in English 	8	

	<p>and other languages.</p> <p>8. Develop language games (e.g., word bingo, semantic charades) that reinforce concepts related to phonetics, phonology, morphology, syntax, semantics, and pragmatics.</p>		
	<p>Module IV:</p> <ol style="list-style-type: none"> 1. Explore the basics of natural language processing (NLP) by experimenting with tools like language parsers or sentiment analyzers. Discuss current applications of AI in language processing and its implications. 2. Debate language planning issues such as language policy in education or government. Create proposals for language revitalization or preservation programs for endangered languages. 3. Explore second language acquisition (SLA) theories by comparing and contrasting theories from Krashen, Chomsky, and others. Develop teaching materials based on SLA principles and conduct peer-teaching sessions. 4. Analyze theoretical frameworks in applied linguistics (e.g., communicative competence, critical discourse analysis). Discuss how theories inform language teaching practices and language policy. 5. Map dialect regions based on isoglosses and create a presentation on dialect continua. Discuss how sociolinguistic variables (e.g., age, social class) influence language variation. 6. Analyze speeches or political discourse to examine language use and power dynamics. Discuss how language reinforces or challenges social hierarchies and ideologies. 7. Conduct a survey or interview study on language differences between genders. Analyze linguistic features associated with gender identity and discuss implications for gender equality. 8. Debate linguistic rights issues such as language policies in education and media representation. Discuss linguistic imperialism and efforts to promote linguistic diversity. 	8	

Note: The course is divided into five modules, with four having total 16 fixed units and one open-ended module with a variable number of units. There are total 45 instructional hours for the fixed modules and 30 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (20 marks) and the fixed modules (10 marks). The final exam, however, covers only the 16 units from the fixed modules.

		<p>Module I:</p> <ol style="list-style-type: none"> 1. Whisper Down the Line – Whispering a message down a line of learners. For a commerce twist, start with a complex business concept or scenario whispered to the first learner. After it's passed down the line, have the last learner explain it out loud. Discuss the discrepancies and emphasize the importance of active listening. 2. Elevator Pitch Challenge: Learners develop a compelling “elevator pitch” for a new product, business idea, or service within a short time limit (typically 30-60 seconds). They then present their pitch to the class or a small group, aiming to grab attention and spark interest (with a twist - learners can pitch their ideas to a “potential investor”; played by another learner, focusing on persuasion and highlighting the value proposition). 3. The Case of the Missing Drones – The activity highlights the importance of strong supply chain management and risk mitigation strategies for e-commerce businesses. Understanding potential vulnerabilities, like theft or logistical errors, is crucial to ensure smooth operations and customer satisfaction and explore what steps they could take to minimize the risk of similar incidents in the future (e.g., implementing real-time tracking, strengthening security measures at warehouses). 4. Black Friday Frenzy - A major retailer accidentally leaks its Black Friday deals early, causing chaos and long lines. Instead of whispering “Black Friday,” each person whispers a different holiday (e.g., Christmas, Valentine's Day). 5. Assign learners to listen to a business-related podcast episode and write a critical summary analyzing the key points, arguments, and their implications for the business world. 6. Organize a debate on a current business issue, encouraging learners to research, formulate arguments, and critically engage with opposing views. 7. Have learners present a business case study analysis, focusing on the critical evaluation of the situation, decisions made, and outcomes. 8. Implement peer review sessions where learners critique each other’s written work, providing constructive feedback on the analysis, coherence, and persuasiveness of arguments. 	8
