

REPORT

Activity: water quality analysis for neighbourhood

Number of students participated: 32

Water quality analysis was conducted by the members of Jalasree club for the people of neighbouring houses during June to December (monsoon & post monsoon seasons) in 2017. Students visited the houses and collected well water samples. The samples were brought to the Jalasree Harithasala Laboratory associated with the Department of Botany. After analyses, water cards were distributed. The analyses were conducted three times, during the pre-monsoon, monsoon and post monsoon seasons. 32 students from the 3rd year BSc Botany were involved in the programme.
