

REPORT

Activity: planting saplings along waysides

Number of students participated :26

During June to September 2017, students from the department of Botany planted saplings along the two sides of the road leading to the college from Malaparamba. 26 students participated in the activity. The programme was conducted during the monsoon season to ensure proper growth of the saplings. The saplings were taken care of by the students periodically.

Sapling beds prepared for planting along way sides
