

REPORT

Activity :water quality analysis for students of the adopted school

Number of students participated: 16

Water quality analysis was conducted by the members of Jalasree club for the students of the adopted school, MAM UP School, Parambil Bazar during three times between July and December 2017. Students visited the school and collected well water samples brought by the students from their houses. For collecting samples, sterile collection bottles were distributed on the previous day. The samples were brought to the Jalasree Harithasala Laboratory associated with the Department of Botany. After analyses, water cards were distrusted. The analyses were conducted three times, during the pre-monsoon, monsoon and post monsoon seasons. 16 students from the 3rd year BSc Botany were involved in the programme.

Well with Non potable water
